INTRODUCTION

The Wu-han Heat and Thermal Power Plant (Ching-shan) is located within the Wu-han Iron and Steel Plant and approximately 8.2 nautical miles northeast of the center of Wu-han, China.

BASIC DESCRIPTION

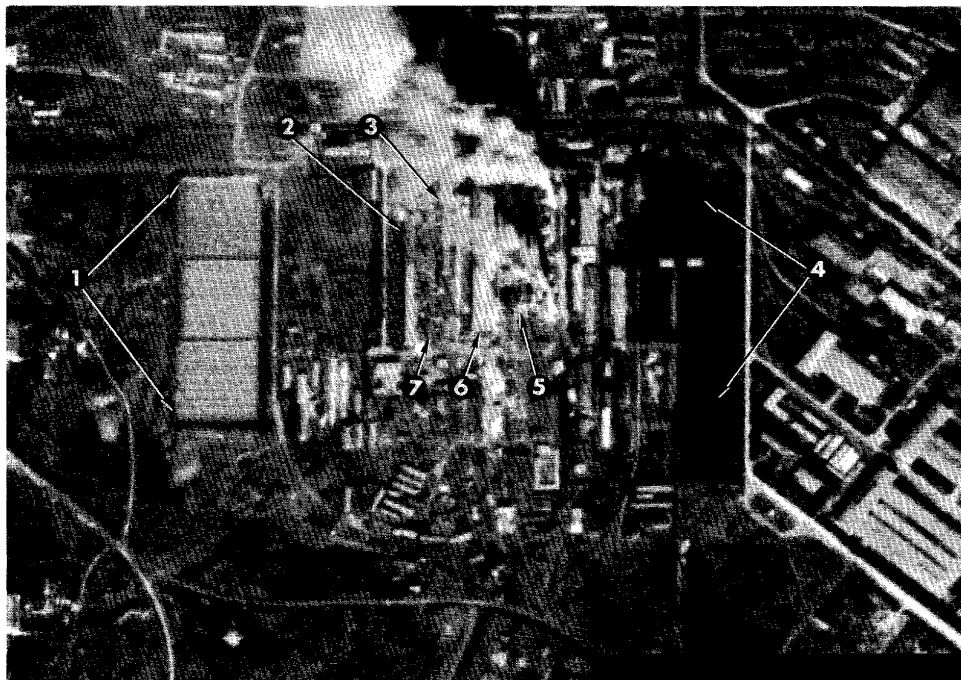

The power plant is rail served, coal operated, and has no apparent security.

Since the date of the latest photography used in the referenced report, an addition to the boilerhouse has been constructed and two new boiler units installed.

Steam lines lead from the power plant to the area of the iron and steel plant. The power plant was observed in operation on all the referenced imagery as evidenced by smoke emanating from both stacks. Because of the poor quality of the photography and smoke coming from the stacks, no measurements of the facility could be obtained.
